

DEPICT

(Descriptive Elements of Pharmacist Intervention Characterization Tool)

Study ID:

Item	Answer
A. Contact with the patient:	y/n
1A. face-to-face contact	
2A. remote contact	
B. Timing of the intervention:	y/n
3B. at patient admission to a hospital, nursing home or emergency department	
4B. during hospital or nursing home stay	
5B. at patient discharge or interfacility transfer	
6B. when a new or changed prescription is provided	
7B. at the time of drug dispensing	
C. Setting of the intervention:	y/n
8C. participant's home	
9C. community pharmacy	
10C. ambulatory or primary care setting co-located with medical services	
11C. independent ambulatory or primary care setting	
12C. hospital (inpatients)	
13C. long-term care facility	
D. Target population:	y/n
14D. condition-specific intervention	
15D. population-specific intervention	
E. Clinical data sources:	y/n
16E. all current medications in use by the patient	
17E. pharmacy or dispensing records	
18E. laboratory tests or drug monitoring data	
19E. disease self-monitoring data	
20E. patient's physical or functional assessment	
21E. medical records	
22E. patient interview (anamnesis)	
F. What is assessed:	y/n
23F. medication use process	
24F. legal or administrative aspects of drug prescriptions	
25F. patient's knowledge, health literacy or communication skills	
26F. patient's adherence to treatment	
27F. health outcomes	

(Descriptive Elements of Pharmacist Intervention Characterization Tool)

Item	Answer
28F. patient's quality of life	
29F. patient's satisfaction	
30F. costs of treatment	
G. Pharmacist's autonomy to:	y/n
31G. change dosage regimen	
32G. suspend medication	
33G. start a new medication	
34G. order laboratory tests or perform drug monitoring	
H. Pharmacist communication:	y/n
35H. directly with the patient	
36H. with the physician or healthcare team	
37H. written recommendations to the physician or healthcare team	
38H. face-to-face or telephone recommendations to the physician of healthcare team	
I. Support resources provided by the pharmacist:	y/n
39I. a patient's medication list to the physician	
40I. a medication list or summary to the patient	
41I. written, video or audio educational material to the patient	
42I. medication adherence or administration aid	
43I. disease self-management diary	
J. Education and counseling	y/n
44J. disease-specific or medication counseling to the patient	
45J. lifestyle or self-management education to the patient	
46J. education program to a group of patients	
L. Follow-up	y/n
47L. focus on medication use process	
48L. focus on health or therapeutic outcomes	
49L. follow-up is performed through face-to-face encounters	
50L. follow-up is performed through remote contacts	
51L. duration of the follow-up*	<i>*write the number of months</i>
M. Other actions	y/n
52M. screening for disease risk factors	
53M. development of a drug formulary, guideline or clinical protocol	
54M. provider or prescriber education
